👤 Profile

Graduate in Management Engineering with a strong interest in data analysis, process optimization, and programming. In my thesis, "Analysis of Collaboration Policies between Shipping Companies," I studied logistical strategies and market dynamics. I have computer skills in data analysis and development, which I apply to improve operational efficiency and support business decisions.

I have these Technical Skills :

- Advanced knowledge in the use of Word, Excel, and PowerPoint;
- Good knowledge in programming languages such as Python and Javascript with experience in the use of Vue.js and Sass for frontend development.
- Excellent knowledge in Markup languages such as: HTML, CSS,
- Good command of mathematical calculations;
- Sufficient knowledge of electrical circuits and industrial plants;
- Good knowledge of business processes and their optimization, warehouse logistics and Point of Sale Management, database analysis and mastery.

I am an ambitious, determined person with a strong ability to adapt to new tasks and professional contexts. I am particularly open to opportunities for relocation abroad and available to travel for work needs.
